Professional Summary

Motivated undergraduate engineering student with hands-on experience in data analytics, business intelligence, SQL, and dashboard development. Proficient in Python, Power BI, Excel, and database management, with a strong ability to analyze data and deliver actionable insights through data-driven solutions.

Technical Skills

Programming: Python, C

Databases: SQL, MySQL, PostgreSQL, SQL Server

BI & Analytics: Power BI, Tableau, Power Query, DAX, Excel

Data Analytics: Data Cleaning, EDA, Data Visualization, Statistical Analysis, KPI Reporting

Concepts: Data Modeling, ETL, Machine Learning, Business Intelligence, DSA

Tools: Git, GitHub, Jupyter Notebook, VS Code

Projects

Remote Environment Monitoring System using Machine Learning

Mar 2025 – Apr 2025

- Built an IoT-based environmental monitoring system using ESP32 and MQ gas sensors.
- Collected and analyzed real-time air quality, temperature, and humidity data.
- Performed data cleaning and preprocessing using Python, Pandas, and NumPy.
- Developed a Random Forest model for air quality prediction and monitoring.
- Integrated IoT hardware with predictive analytics to support automated alerts and decision-making.

DDoS Attack Detection using Machine Learning

Mar 2025 – Apr 2025

- Developed a machine learning-based system for detecting Distributed Denial of Service (DDoS) attacks.
- Collected, cleaned, and preprocessed network traffic datasets using Python.
- Conducted exploratory data analysis and feature engineering to identify attack patterns.
- Trained and evaluated classification models including Random Forest and Decision Tree algorithms.
- Generated actionable insights to improve network security monitoring and threat detection.

Shopify US Sales Analysis Dashboard

May 2025 – Jun 2025

- Designed an interactive Power BI dashboard to analyze sales performance and profitability trends.
- Transformed and modeled data using Power Query and DAX measures.
- Developed KPI reports for revenue, profit margin, and customer growth tracking.
- Delivered business insights through dynamic visualizations and executive-level reporting.

Music Store Sales Analysis using SQL

Apr 2025 – May 2025

- Analyzed the Chinook database using advanced SQL queries and relational database concepts.
- Identified top-performing customers, artists, cities, and countries based on sales metrics.
- Utilized joins, aggregations, subqueries, and filtering techniques for data analysis.
- Generated insights to support customer segmentation and business decision-making.

Education

VNR Vignana Jyothi Institute of Engineering and Technology, Hyderabad

Bachelor of Technology (B.Tech), Electronics and Communication Engineering

2023 – 2027

Relevant Coursework

Database Management Systems (DBMS), Data Structures and Algorithms, Statistics, Operating Systems, Computer Networks, Machine Learning, Business Analytics

Certifications

- Microsoft Data Analyst Learning Path – LinkedIn Learning (2025–2026)
